Bitfinex uploads code for its data streaming platform Dazaar on Github.

One of the leading crypto exchanges Bitfinex has announced an open-source, peer-to-peer data streaming platform that will allow users to share media across a decentralized network. The data streaming platform called Dazaar was announced earlier this week by the crypto exchange. The crypto exchange has uploaded the code for Dazaar protocol to Github, describing a [...]

Fund Managers Double Down on Anti-Ethereum Sentiment: Here's Why

Ethereum, the network not the cryptocurrency, has seen an eruption in adoption and usage over recent weeks. Blockchain analytics firm Santiment reported that the number of new addresses on the network is passing 100,000 per day. This is slightly shy of the 116,000 per day year-to-date high but still impressive. Santiment further explained: "Ethereum's network growth metric has rapidly been on the rise since the beginning of 2020, creating 237% more addresses yesterday than it did [...]"

The U.K. financial regulator suspends Wirecard Card Solutions that issues Visa crypto debit cards.

The U.K.'s regulatory body Financial Conduct Authority (FCA) has suspended Wirecard's subsidiary, Wirecard Card Solutions (WCS), which issues Visa crypto debit cards. The Financial Action Authority said that Wirecard Card Solutions is no longer permitted to conduct any regulated activities" and must not dispose of any assets or funds. The FCA further noted that there [...]

Farming yield: when the crops go bad

Quick TakeLiquidity mining has become the latest trend in the digital asset sector, where users have been coming in droves to protocols looking to "farm" yield. The potential for profit has attracted speculators that have remnants of the 2017 ICO bubble, where we have seen a significant appreciation toward DeFi tokens. "Farming yield" will likely not end well for many participants, where they will either get left holding the bag or even worse, lose it all due to a smart contract vulnerability.
